Re: Testimony to Newfresh product

Hi Wee Chong,

I would like to congratulate you on your successful design and developed air-cleaning product (both for cars and for rooms). I have and am still using the car (Coral) and the room (Vase) product and would highly recommend to people who are conscious about healthy living without paying too much to achieve it!

I have a Coral plugged in my car and every time I turn on the air cleaner, I can feel the difference in the air quality very quickly. It is most effective when I need to carry cooked food in the car as the smell can linger in the car for days. With Coral, there is no more left over smell every time I bring cooked food into my car!

I have also a Vase installed in the bathroom. It is very effective in getting rid of the unpleasant smell of damped and stale air. It is also very effective in removing the smell after using the toilet for passing motion....

Several feedbacks on the product:

1. Make Vase bigger so that it can cover a bigger space
2. Consider rechargeable option so that it can be portable for those who do not have a power source in the bathroom or wardrobe.
3. As for Coral, fan noise is a bit loud

Please continue the good work on this product and looking forward to your new product range!

Best regards,

Ng Muan Leong, Leon
